

New York Stock Market

New York, September 14.—The stock market today had to bear the burden of profit-taking on the rise of yesterday and was affected accordingly. A considerable movement of stock yesterday after the prolonged period of apathy and listlessness was not to be neglected by the long suffering professional operators. The advantage of the opportunity was increased by a considerable inflow of orders from outside sources, attracted by the stirring of yesterday's market. The action of the market gave evidence of efforts to extend these advantages in the bidding up of opening prices in the cotton market, offering of stocks as fast as the market would take them without hurting price. These operations kept up the howls of animosity in the cotton market for the first hour, after which there was a lapse into dullness, the day terminating in a sharp reaction.

Quotations continued to occupy a large share of attention, but there was a disposition among some of the larger financial powers to depreciate the importance of the stock market as a field for expression of opinions on political prospects. The sentiment of the speculation was unaltered, but the official outlook has declined in influence on the financial situation. A division of power in the coming Congressional session has been a factor in the estimation of some of the financial interests whose contention it is that legislative quiescence would prove an advantage to business and would relieve enterprise from restraint and hesitation. At the same time there was heard the opinion that open reflection of such views in stock market activity was calculated to stir up renewed agitation against corporate interests.

The subsidence of anxiety over the banking position of the country provided a substantial substratum for the confidence that is growing up. This was manifest in the reception of the news of the rejection by the London conference of foreign bankers of a validation plan for American cotton shipment.

The resources of the domestic money market seem now so assured that the extra requirement thus implied causes no anxiety. This is partly due to the conviction that American cotton owners have the advantage of position in the necessity of the foreign spinners for the supply of cotton. It is reported that a recent remonstrance from a French bank over the lack of a bank guarantee on a cotton loan had been accompanied by a draft was met by the intimation that the cotton was waiting for payment, which might be arranged as a foreign bank might choose.

There are broad intimations that a general attitude along similar lines will be adopted, with no fears that a compromise will not be forthcoming as a result.

Money continues to work easier both in New York and inland. Chicago reports a renewal of the demand for farm mortgage on the part of insurance companies, with interest rates marked down from 6 to 5-1/2 per cent. An important relief is thus afforded from the burdens on the country banks in connection with the extensive and purchases of the past year. Returns from national banks to the Comptroller show somewhat mixed results in the comparison of the loan item on September 1, with June 30, considering the increasing requirements of the season, the showing is held to be satisfactory.

Today's crop advice were favorable and made a helpful factor towards sustaining prices.

Bonds were firm. Total sales, par value, \$2,641,000. United States 2s declined -3/8 per cent. on call. Total sales of stocks for the day were \$55,100 shares.

New York, September 14.—Close: Prime mercantile papers, 5-1/2 to 6 per cent. sterling exchange, firm, with a slight business. Bankers' bills, \$4,850 to \$4,950 for sixty-day bills, and at \$4,800 for demand. Commercial bills, \$4,850 to \$4,950 for 60-day bills, 1-1/2 to 2 per cent. on call. Time loans, 1-1/2 to 2 per cent. on call. Time loans, 1-1/2 to 2 per cent. on call. Time loans, 1-1/2 to 2 per cent. on call.
